

JOIN Quiz 2

JOIN Quiz - part 2

1. Select the statement which lists the unfortunate directors of the movies which have caused financial losses (gross < budget)

```
SELECT JOIN(name FROM actor, movie
            ON actor.id:director WHERE gross < budget)
GROUP BY name
```

```
SELECT name
FROM actor INNER JOIN movie BY actor.id = director
HAVING gross < budget
```

```
SELECT name
FROM actor INNER JOIN movie ON actor.id = director
WHERE gross < budget
```

```
SELECT name
FROM actor INNER JOIN movie ON actor.id:director
WHERE gross < budget
```

```
SELECT name
FROM director INNER JOIN movie ON movie.id = director.id
WHERE gross < budget
```

2. Select the correct example of JOINing three tables

```
SELECT *
FROM actor JOIN casting BY actor.id = actorid
```

```
JOIN movie BY movie.id = movieid
```

```
SELECT *  
FROM actor JOIN casting ON actor.id = actorid  
AND JOIN movie ON movie.id = movieid
```

```
SELECT *  
FROM actor JOIN casting  
JOIN movie ON actor.id = actorid  
AND movie.id = movieid
```

```
SELECT *  
FROM actor JOIN casting ON actor.id = actorid  
AND movie ON movie.id = movieid
```

```
SELECT *  
FROM actor JOIN casting ON actor.id = actorid  
JOIN movie ON movie.id = movieid
```

3. Select the statement that shows the list of actors called 'John' by order of number of movies in which they acted

```
SELECT name, COUNT(movieid)  
FROM actor JOIN casting ON actorid=actor.id  
WHERE name IN 'John %'  
GROUP BY name ORDER BY 2
```

```
SELECT name, COUNT(movieid)  
FROM actor JOIN casting ON actorid=actor.id  
WHERE name LIKE 'J%'  
GROUP BY name ORDER BY 2 DESC
```

```
SELECT name, COUNT(movieid)  
FROM casting JOIN actor ON actorid=actor.id
```

```
WHERE name LIKE 'John %'
GROUP BY name ORDER BY 2 DESC
```

```
SELECT name, COUNT(movieid)
FROM casting JOIN actor
WHERE (actorid ON actor.id)
AND name LIKE 'John %'
GROUP BY name ORDER BY 2 DESC
```

```
SELECT name, COUNT(movieid)
FROM casting JOIN actor
WHERE name LIKE 'John %'
GROUP BY name ORDER BY COUNT(movieid) DESC
```

4. Select the result that would be obtained from the following code:

```
SELECT title
FROM movie JOIN casting ON (movieid=movie.id)
JOIN actor ON (actorid=actor.id)
WHERE name='Paul Hogan' AND ord = 1
```

Table-A

"Crocodile" Dundee	1
Crocodile Dundee in Los Angeles	1
Flipper	1
Lightning Jack	1

Table-B

"Crocodile" Dundee
Crocodile Dundee in Los Angeles
Flipper
Lightning Jack

Table-C

"Crocodile" Dundee
Paul Hogan
1

Table-D

"Crocodile" Dundee	Paul Hogan	1
Crocodile Dundee in Los Angeles	Paul Hogan	1
Flipper	Paul Hogan	1

Lightning Jack	Paul Hogan	1
----------------	------------	---

Table-E

"Crocodile" Dundee	Paul Hogan
Crocodile Dundee in Los Angeles	Paul Hogan
Flipper	Paul Hogan
Lightning Jack	Paul Hogan

5. Select the statement that lists all the actors that starred in movies directed by Ridley Scott who has id 351

```
SELECT name
FROM movie JOIN casting
AND actor ON movie.id = movieid
AND actor.id = actorid
WHERE ord = 1
AND actor = 351
```

```
SELECT name
FROM movie JOIN casting
JOIN actor ON movie.id = movieid
OR actor.id = actorid
WHERE ord = 1 AND director = 351
```

```
SELECT name
FROM movie JOIN casting ON movie.id = movieid
JOIN actor ON actor.id = actorid
WHERE ord = 1 AND actorid = 351
```

```
SELECT name
FROM movie JOIN casting ON movie.id = movieid
JOIN actor ON actor.id = actorid
WHERE ord = 1 AND director = 351
```

```
SELECT name
FROM movie JOIN casting ON movie.id = actorid
JOIN actor ON actor.id = movieid
WHERE director = 351
```

6. There are two sensible ways to connect movie and actor. They are:

- link the director column in movies with the id column in actor
- join casting to itself

- link the actor column in movies with the primary key in actor
- connect the primary keys of movie and actor via the casting table

- link the director column in movies with the primary key in actor
- connect the primary keys of movie and actor via the casting table

- link the director column in movies with the primary key in actor
- connect the primary keys of movie and casting via the actor table

- link the movie column in actor with the director column in actor
- connect movie and actor via the casting table

7. Select the result that would be obtained from the following code:

```
SELECT title, yr
FROM movie, casting, actor
WHERE name='Robert De Niro' AND movieid=movie.id AND actorid=actor.id AND ord = 3
```

Table-A

A Bronx Tale	1993	3
Bang the Drum Slowly	1973	3
Limitless	2011	3

Table-B

A Bronx Tale	1993
Bang the Drum Slowly	1973
Limitless	2011

Table-C

A Bronx Tale	3
Bang the Drum Slowly	3

Limitless	3
-----------	---

Table-D

A Bronx Tale
Bang the Drum Slowly
Limitless

Table-E

A Bronx Tale	Robert De Niro	1993
Bang the Drum Slowly	Robert De Niro	1973
Limitless	Robert De Niro	2011

Score the test

Your score is: 7 out of 7
